

ColdFusion Developer (2 Positions)

Employment Type

Full-Time

The ColdFusion Web Application Developer is responsible for developing web applications, tools, and processes using ColdFusion and Java. This candidate will also assist with maintenance and new development on an existing suite of ColdFusion applications.

Duties and Responsibilities:

- Assist with the development of new web applications in ColdFusion and Java
- Assist with customizations needed to support individual client requirements
- Assist with maintaining an existing suite of applications written in ColdFusion/Railo/Lucee
- Work closely with the business development and design teams to ensure the overall vision of the product line is maintained

Requirements:

- 2+ years of development with ColdFusion
- 4+ years of development with PHP, ColdFusion, or similar web development languages
- Must be able to traverse an existing codebase in a framework similar to Symfony2 PHP
- Must be proficient in writing SQL queries for MySQL or MS SQL Server
- Strong understanding of HTML, CSS, and general web application technologies
- Strong understanding of secure coding techniques, particularly in the areas of online payments and healthcare privacy
- Ability to work efficiently and reliably with minimal oversight
- Ability to manage multiple priorities and assist with various projects simultaneously

Desirable Skills:

- Experience developing or modifying web services written in Java
- PCI and HIPAA audit experience

Compensation

\$60,000 to \$90,000 Annually

Benefits Offered

401K, Dental, Life, Medical, Vision
