

## IT Business Analyst

We are seeking an IT Business Analyst to become an integral part of our project team! You will work with the Business and Development teams to develop and maintain our software product line of client facing applications.

### **Responsibilities:**

- Use all aspects of the Agile Software Development Life Cycle (SDLC)
- Document requirements, define scope and objectives, and formulate systems to parallel overall business strategies.
- Act as liaison and adviser to clients, sometimes acting as the primary contact
- Design, modify, develop and write requirements and specifications of software programming applications.
- Works with QA on the creation and maintenance of test scripts for SIT and UAT

### **Qualifications:**

- 5+ years of experience in business analysis using SDLC
- 5+ years of experience creating and maintaining test scripts for SIT and UAT
- Minimum of 5 years' experience creating Business Requirement Documents (BRDs)
- 3+ years creating Functional Requirement Documents (FRDs)
- Experience using Wireframe/Mock up tools such as Balsamiq
- Ability to effectively communicate with technical and non-technical stakeholders at all levels
