Travel < 5% (Must be available for airplane travel as needed)

### **Description**

The Java Spring API Developer is responsible for building and maintaining web services and other service-oriented applications necessary to provide a robust API for both internal and external customers. The ideal candidate should have a solid working knowledge of Core Java, Java Spring, and Spring REST API development. Experience in a microservice/SOA environment is a huge plus. Experience with AngularJS also a plus.

### **Responsibilities**

- Assist with designing and implementing low level and middle tier web services to provide an extensible application framework
- Ensure that security and data access restrictions are enforced at every level

### **Required Skills**

- 4+ years of API and web service development using Spring
- 6+ years of Java web development
- Demonstrated ability to develop horizontally scalable systems
- Understanding of REST principles and API patterns
- Strong understanding of secure coding techniques, particularly in the areas of online payments and healthcare privacy
- Ability to work efficiently and reliably with minimal oversight
- Ability to manage multiple priorities and assist with various projects simultaneously

### **Desired Skills**

- Experience with Spring Boot and JPA
- Experience with Groovy
- Experience with test driven development or other integral testing methods

- Experience integrating with payment processing APIs
- Experience integrating with email and SMS APIs
- PCI and HIPAA audit experience

**Physical Demands**

- Extensive use of computer and keyboard and viewing of computer screen is required;
- Long periods of sitting required
- Regular use of VOIP phone system for phone calls

Base Salary - \$90,000
