

## **Applications Development Manager Job Posting**

We are seeking an experienced Applications Development Manager to join our growing team! In this role, you will manage and mentor multiple skilled development teams delivering an array of SaaS based applications serving the healthcare vertical. This is an opportunity to lead the charge on continuously improving our application development process. The Applications Development Manager will manage teams using multiple development platforms including Java, ColdFusion, Angular, and AWS to deliver scalable, maintainable, and extensible applications. The Applications Development Manager should thrive in a fast-paced Agile development environment.

### **Responsibilities:**

- Lead, manage, and mentor development teams (8+ developers and growing) to ensure the software development process is followed and ensure the security and quality of the code meets the required standards
- Establish timelines and deliverable dates for prioritization of work within the application development teams to meet deadlines and deliver products on time
- Prepare project plans and schedules for application development including enhancements and maintenance efforts
- Make critical recommendations regarding balancing feature and operational priorities, and set high standards for quality and on-time delivery
- Collaborate effectively with peer teams to bring the product to market, followed by delivering additional features at a rapid pace

### **Qualifications:**

- 4+ years of experience managing application development teams
- 6+ years of senior level experience with developing complex web-based applications
- Proven track record of delivering large, complex, scalable applications, on time
- Proven track record in leading high performing and talented team of application developers
- Experience building solutions using AWS technologies

- Experience with professional software engineering best practices such as Agile project management, coding standards, code reviews, source control management, build processes, testing and operation
- Ability to communicate clearly with technical and non-technical stakeholders at all levels
- Strong analytical and problem-solving skills
- Positive and professional attitude toward customers, employees, vendors, and management
- Good verbal and written communication skill
- Ability to communicate with both technical and non-technical personnel
- Associates Degree or equivalent
- Highly prefer PCI or HIPAA compliance audit experience
